

Bioline Ceiling Panels

Bioline Wood Ceiling Tiles add warmth and elegance to any décor. They are available in two distinctive styles and are made from recycled, renewable materials. The Solid Finish tiles provide the beauty of real wood veneer while the Organic Finish tiles offer a unique fiber texture.

Solid finish Bioline panels contain 70% recycled materials. Choose from custom or standard natural wood veneers, including cherry, beech, maple, and bamboo in perforated or un-perforated options.

Bioline Organic panels reduce reverberation and echo by absorbing between 55 to 80 percent of the sound directed toward them. Made of 80% recycled material, Organic panels are offered in custom or three standard wood shades of light, medium and dark to compliment you décor.

Panel Size	Standard 2' x 2' ; 2' x 4' ; custom
NRC	0.40 (Solid Perforated); 0.55 (Organic)
