

Harmoni Ceiling Panels

Harmoni Ceiling Panels are the natural choice when you're looking for a way to combine contemporary styling with excellent acoustical control at a moderate price.

Harmoni tiles are built from out exclusive and lightweight willtec foam, making for easy installation and excellent sound absorption across all frequencies. The tiles are available in two styles, each with a tegular edge. The Vista pattern has a smooth surface for a clean look while the Tartan pattern provides a softly sculpted style.

Harmoni tiles are Hypalon coated in white, black, light grey or almond for easy cleaning and durability. Since Harmoni Ceiling Tiles are naturally mold-resistant and fire-retardant, extra protective coatings are not needed.

If you're looking for aesthetic flair, sound absorption, and functionality at an affordable price, Harmoni tiles are designed to deliver. Their combined attributes make them a unique and welcome architectural option.

Coefficients per ASTM C423-90a

	125Hz	250Hz	500Hz	1kHz	2kHz	4kHz	NRC
2"	0.89	0.84	0.78	1.02	1.05	1.00	0.90
